Data Analysis Executive Summary

Generated by Data Analyst Agent

DATASET	ROWS	COLUMNS	MISSING VALUES
Zomato Restaurant Dataset.csv	9551	21	9

Executive Summary

1. Dataset Overview

Rows: 9551. Columns: 21.

Missing cells: 9. Duplicate rows: 0.

2. Missing Values

Cuisines: 9 missing values (0.09% of rows).

3. Data Quality Review

Some values are missing in the fields listed above. The profile alone does not explain why values are missing.

4. Numeric Flags to Review

Flagged columns: Country Code, Longitude, Latitude, Average Cost for two, Votes. These are statistical review flags, not confirmed errors. Codes, coordinates and currency units need context.

5. Suggested Checks

* Check the data types of each column to ensure consistency and accuracy. For example, verify that the "Longitude" and "Latitude" columns contain numeric values.

* Investigate incomplete entries in the dataset, such as missing values or empty strings,

to determine if they require imputation or removal.

6. Possible Next Analysis

* Analyze the relationship between the "Cuisines" column and the "Average Cost for two" column to understand how different cuisines affect the cost of meals.
